

# Type G - Cookers

## Approved Fuels

Fuels regarded as suitable for the appliances in this section are listed, as approved closed appliance fuels, in the Manufactured Smokeless Fuels, Natural Smokeless Fuels and Bituminous Coal sections of *Part 3 - Wood, Biomass & Solid Mineral Fuels* of this Guide. Where wood logs are specified they are to standard given in BS EN 12815.

G

### Special Note

Where these appliances were tested as continuous burning appliances against BSEN 12815 (which requires a minimum refuelling period at low output of 10h for wood and 12h for smokeless fuels) this is noted in the **Appliance Feature Icon** area. Where they have not met this requirement they are classed as "intermittent".

## Type G12 - Cookers; Without Boilers/with Domestic Boilers Output Not Exceeding 3.5Kw - Wood Logs
